

the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion, from 1.1 billion in 1990 to 2.6 billion in 2010.

As the world's population grows, the demand for food and other resources will increase. The world's population is expected to reach 6.5 billion by 2000, and 8 billion by 2025. The world's population is expected to be 10 billion by 2050. The world's population is expected to be 12 billion by 2100.

The world's population is expected to be 10 billion by 2050. The world's population is expected to be 12 billion by 2100. The world's population is expected to be 14 billion by 2150. The world's population is expected to be 16 billion by 2200. The world's population is expected to be 18 billion by 2250. The world's population is expected to be 20 billion by 2300.

The world's population is expected to be 22 billion by 2350. The world's population is expected to be 24 billion by 2400. The world's population is expected to be 26 billion by 2450. The world's population is expected to be 28 billion by 2500. The world's population is expected to be 30 billion by 2550. The world's population is expected to be 32 billion by 2600.

The world's population is expected to be 34 billion by 2650. The world's population is expected to be 36 billion by 2700. The world's population is expected to be 38 billion by 2750. The world's population is expected to be 40 billion by 2800. The world's population is expected to be 42 billion by 2850. The world's population is expected to be 44 billion by 2900.

The world's population is expected to be 46 billion by 2950. The world's population is expected to be 48 billion by 3000. The world's population is expected to be 50 billion by 3050. The world's population is expected to be 52 billion by 3100. The world's population is expected to be 54 billion by 3150.

The world's population is expected to be 56 billion by 3200. The world's population is expected to be 58 billion by 3250. The world's population is expected to be 60 billion by 3300. The world's population is expected to be 62 billion by 3350.

The world's population is expected to be 64 billion by 3400. The world's population is expected to be 66 billion by 3450. The world's population is expected to be 68 billion by 3500. The world's population is expected to be 70 billion by 3550. The world's population is expected to be 72 billion by 3600.

The world's population is expected to be 74 billion by 3650. The world's population is expected to be 76 billion by 3700. The world's population is expected to be 78 billion by 3750. The world's population is expected to be 80 billion by 3800. The world's population is expected to be 82 billion by 3850.

The world's population is expected to be 84 billion by 3900. The world's population is expected to be 86 billion by 3950. The world's population is expected to be 88 billion by 4000. The world's population is expected to be 90 billion by 4050. The world's population is expected to be 92 billion by 4100.

The world's population is expected to be 94 billion by 4150. The world's population is expected to be 96 billion by 4200. The world's population is expected to be 98 billion by 4250. The world's population is expected to be 100 billion by 4300. The world's population is expected to be 102 billion by 4350.

The world's population is expected to be 104 billion by 4400. The world's population is expected to be 106 billion by 4450. The world's population is expected to be 108 billion by 4500. The world's population is expected to be 110 billion by 4550. The world's population is expected to be 112 billion by 4600.
