

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of people aged 15 and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999.

There are a number of factors that have contributed to this increase in the number of people in the world. One of the main factors is the decline in the death rate, particularly among children. In 1980, the death rate among children under 5 years of age was 100 per 1,000 live births. By 1999, this rate had fallen to 50 per 1,000 live births. This decline in the death rate has been due to a number of factors, including improvements in medical care, better nutrition, and better sanitation.

Another factor that has contributed to the increase in the number of people in the world is the increase in life expectancy. In 1980, the life expectancy at birth was 67 years. By 1999, this had increased to 74 years. This increase in life expectancy has been due to a number of factors, including improvements in medical care, better nutrition, and better sanitation. The increase in life expectancy has also led to an increase in the number of people aged 65 and over, from 0.4 billion in 1980 to 0.7 billion in 1999.

The increase in the number of people in the world has led to a number of challenges. One of the main challenges is the need for more food, water, and shelter. The world's population is growing faster than the world's food supply, and this is leading to a shortage of food in many parts of the world. The world's water supply is also under increasing pressure, and this is leading to a shortage of water in many parts of the world. The world's shelter supply is also under increasing pressure, and this is leading to a shortage of shelter in many parts of the world.

Another challenge is the need for more education and training. The world's population is growing faster than the world's education and training supply, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world.

The increase in the number of people in the world has led to a number of challenges. One of the main challenges is the need for more food, water, and shelter. The world's population is growing faster than the world's food supply, and this is leading to a shortage of food in many parts of the world. The world's water supply is also under increasing pressure, and this is leading to a shortage of water in many parts of the world. The world's shelter supply is also under increasing pressure, and this is leading to a shortage of shelter in many parts of the world.

The world's population is growing faster than the world's food supply, and this is leading to a shortage of food in many parts of the world.

The world's water supply is also under increasing pressure, and this is leading to a shortage of water in many parts of the world. The world's shelter supply is also under increasing pressure, and this is leading to a shortage of shelter in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world.

The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world.

The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world.

The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world.

The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world. The world's education and training supply is also under increasing pressure, and this is leading to a shortage of education and training in many parts of the world.
